

WIRELESS FIRE ALARM INTRODUCED!

Honeywell Fire Systems has recently introduced the Notifier Smart Wireless Integrated Fire Technology (SWIFT) products that can be added on to the Notifier line of fire alarm control panels. SWIFT uses a wireless mesh technology where each module or detector can relay signals to other devices on the system. It offers an opportunity to provide fire alarm detectors in locations that are difficult or expensive to install with conventional wiring methods. We have already had one project that needed additional smoke detectors added, and the electrical contractor told us there was no way to get wiring to the new location. Fortunately, the SWIFT smoke detectors were available and solved the problem!

Notifier distributors have already provided SWIFT systems for large libraries and historical buildings where it was very impractical to try and install a complete wiring system, and the system can support over 200 wireless devices.

POLICY UPDATE

We are changing our policy on AC power loss signals for residential customers, and unless you request otherwise, we will not call you for an AC power loss signal between 11pm and 8am. If you would like to be notified during those hours, please call Tammie or Tracy at (800) 283-3659.

PHONE LINE ALTERNATIVES!

A majority of the fire and security systems presently installed rely on telephone lines to communicate with our central station. If you reduce the number of phone lines, or eliminate them entirely, it will prevent your system from communicating with our central station. This also applies if phone lines are forwarded or turned off for the winter. We have a number of options available, including GSM cellular communicators, internet communicators, and mesh radio network communicators. Each of these options can work with or without phone lines. We encourage you to speak with us about communication options before disabling phone lines!

IS YOUR CALL LIST CURRENT?

Please be sure the information you have provided us for contact persons and phone numbers is still current. We are actively working to make sure we have current cell phone numbers as well, if you have changed personnel or phone numbers for your call list, please help us update our records. Please contact Tracy Morgan at tracymorgan@safetysystems.net or (800) 283-3659 to get a copy of our call list for your account, or to provide updated information.

“QUARTERLY QUOTATION”

“Be thankful we’re not getting all the government we’re paying for.”

— Will Rogers

ACTIVITY STATS

Our central station alarm activity for July, August, and September is as follows:

- **Burglaries:**
 - Commercial..... 5
 - Residential..... 0
- **Holdups:**
 - Commercial..... 0
 - Financial Institution..... 0
- **Fires:**
 - Commercial..... 2
 - Residential..... 0
- **Individuals apprehended..... 0**

COMPANY DIRECTORY:

We sincerely appreciate each of our customers who have entrusted us with their business. While we have implemented a voice mail option on our phone system, a friendly person is always available to take your call. All of our staff can be reached through our toll free number, **(800) 283-3659**. Our fax number is (517) 782-5670. If you prefer to contact one of us directly, we've provided our company directory.

Administration:
