

TECHNOLOGY – 1, ROBBER – 0

In early July one of our financial institution clients had the unfortunate experience of an armed robbery. At approximately 9:30 on a Thursday morning we received a holdup alarm and confirmed a robbery in progress. The police were notified, but unfortunately they arrived after the armed robber had left the scene. However, in addition to providing a premises security system and holdup alarm, we also provided a closed circuit television system that electronically recorded the video from a number of cameras in the facility. We were able to provide the Sheriff's Department with several clear pictures of the suspect, and within hours the department had posted the pictures on their Facebook page, and distributed them to other law enforcement agencies. Shortly after posting the picture, the Sheriff's Department started receiving information about who this individual was. After comparing one of the names provided with a recent booking photo, they were able to identify the individual they were looking for. That evening, a patrol officer from another jurisdiction recognized the suspect in a car, made a traffic stop and arrested the suspect. Police were able to recover both the money taken and the gun suspected of being used in the robbery. Within twelve hours of committing the crime, the suspect was behind bars, and likely facing federal charges. My guess is that he won't be doing that again any time soon!

PROVIDING SECURITY FOR HOMELAND SECURITY!

Safety Systems was recently awarded the fire alarm and security system contracts for the new Customs and Border Patrol regional facility in Port Clinton, OH. We are honored to be selected to

provide the addressable fire alarm system, intercom system, closed circuit television system, intrusion detection system and access control system for this Homeland Security facility. We are always seeking to challenge ourselves, and this was a highly sophisticated integration project utilizing the latest software from Honeywell Security linking cameras, card readers and intrusion detection into an integrated display for the security staff at this facility. Thank you to our project manager, Paul Bentley, and senior technician Rich Savicki for a job well done!

IS YOUR CALL LIST CURRENT?

Please be sure the information you have provided us for contact persons and phone numbers is still current. We are actively working to make sure we have current cell phone numbers as well, if you have changed personnel or phone numbers for your call list, please help us update our records. Please contact Tracy Morgan at tracymorgan@safetysystemsinc.net or (800)283-3659 to get a copy of our call list for your account, or to provide updated information.

“QUARTERLY QUOTATION”

“The human brain is a wonderful thing. It starts working the moment you are born, and never stops until you stand up to speak in public”

– George Jessel

ACTIVITY STATS

Our central station alarm activity for April, May and June is as follows:

- **Burglaries:**
 - Commercial..... 1
 - Schools..... 4
 - Residential..... 1
- **Holdups:** 1
- **Fires:** 2
- **Individuals apprehended..... 49***

*46 students apprehended inside a school during a poorly planned senior prank

COMPANY DIRECTORY:

We sincerely appreciate each of our customers who have entrusted us with their business. While we have implemented a voice mail option on our phone system, a friendly person is always available to take your call. All of our staff can be reached through our toll free number, **(800)283-3659**. Our fax number is (517)782-5670. If you prefer to contact one of us directly, we've provided our company directory.
